

## E-2002 Food Safe Foam Nitrile Gloves

These gloves provide protection in environments where food is prepared or processed in a dry or wet environment, food-oriented machines are handled, cleaned, repaired. Nylon lining allows hands to breathe. They do not contain any active antimicrobial ingredients.

### Nylon Lining

The gray nylon lining reduces colored food from appearing like dirt on the glove.

### Glove Coating

It is covered with thin and durable foam nitrile material which prevents liquid leakages.

### Elastic Wrist

It is designed to keep the glove stable and prevent penetration of external materials into glove.

### Marking Field Includes

It contains all the information that must be given according to European norms..

## Technical Specifications

|                   |   |
|-------------------|---|
| Lining Material   | 15-G Nylon                                  |
| Coating Material  | Foam Nitrile                                |
| Color             | Blue  |
| Sizes             | 7/S, 8/M, 9/L, 10/XL                        |
| Units per Package | 72 Pairs                                    |
| Packaging         | 12 Pairs                                    |
| Category          | CAT II                                      |

## COATED AREA AND LINING MATERIAL

 Indicates coated parts.

### FOAM NITRILE COATING

Thanks to the fully micro-foam nitrile coating on the palm, it protects hands from liquid leaks. It protects from bases, oils, grease, animal oils and many solvents. The second layer coating provides superior wet and dry grip.

### NYLON LINING

Seamless nylon lining provide excellent comfort during applications where objects are held and mounted. Provides protection against sweating through its excellent air permeability.

## STANDARDS

These gloves are intended to protect the hands against mechanical hazards as defined in the PPE Regulation (EU) 2016/425. This product is certified as per EN420 (General requirements and inspection methods for protective gloves), EN388 (Mechanical Risk Protection).

EN 388:2016

3132A

EN 420:2003  
+A1:2009

Dexterity Level  
(min.1-max.5): 5

## Areas of Usage

Food Sector

Fishery

Meat Industry

Milk Industry

It is suitable for use during the manufacture of food products. They can be used in processes that prevent contamination of foodstuffs.

## STANDARD REMARKS

### EN 388:2016

abc def

#### EN 388 Protective Gloves for Mechanical Risks

This standard covers features and test methods for protective gloves against mechanical risks such as abrasion, cutting, tearing, puncturing.

#### FEATURES:

Protective gloves conforming to this standard must meet all applicable properties of EN 420. The performance level of a protective glove against mechanical risks should be at a higher level for one of the attributes (wear, knife cutting, tearing, puncture and impact protection) that are classified according to the least features of each level shown in the table below.

Note - Gloves that meet the specifications for puncture resistance may not be suitable for protection against sharp-pointed objects such as hypodermic needles.

The letter **X** means that the test has not been done or can not be performed.

| PERFORMANCE LEVELS                         | 1   | 2   | 3    | 4    | 5    |
|--|-----|-----|------|------|------|
| a - Abrasion resistance (number of cycles) | 100 | 500 | 2000 | 8000 | -    |
| b - Cut resistance (index)                 | 1,2 | 2,5 | 5,0  | 10,0 | 20,0 |
| c - Tear resistance (N)                    | 10  | 25  | 50   | 75   | -    |
| d - Puncture resistance (N)                | 20  | 60  | 100  | 150  | -    |

| PERFORMANCE LEVELS            | A                           | B | C  | D  | E  | F  |
|-------------------------------|-----------------------------|---|----|----|----|----|
| e - Cut Resistance (N)        | 2                           | 5 | 10 | 15 | 22 | 30 |
| f - Protection Against Impact | Pass (P) / Failed (No sign) |   |    |    |    |    |

### EN 420

#### EN 420 General Specifications and Test Methods

This standard specifies the general requirements for the glove design and construction, protection against hazards, comfort, efficiency and marking and information applicable to all protective gloves. This standard also applies to arm protections.

Many gloves designed for electrical technicians or the most private applications such as surgical operations are governed by private and strict standards.

| GLOVE SIZE | Fits Hand Size | Hand Circumference / Length | Minimum Glove Length |
|------------|----------------|-----------------------------|----------------------|
| 6          | 6              | 152/160 mm                  | 220 mm               |
| 7          | 7              | 178/171 mm                  | 230 mm               |
| 8          | 8              | 203/182 mm                  | 240 mm               |
| 9          | 9              | 229/192 mm                  | 250 mm               |
| 10         | 10             | 254/204 mm                  | 260 mm               |
| 11         | 11             | 279/215 mm                  | 270 mm               |

## User Information

### Maintenance and Cleaning

We recommend you to clean gloves by a normal detergent with 40-60°C of water with maximum of 3 times. After the washing, the performance may not be seen which it is featured in associated pictograms. It is the responsibility of user to control whether glove is suitable for intended use or not, whether it is complete or not and whether protective functions are undamaged or not. User should carry out an examination against potential defects which are likely to adversely affect protection functions (punctures, tears, damaged seams, etc.).

### Service Life

Gloves should be used within three years as of the manufacture date. Service life of the gloves are affected by several factors such as cold, hot, chemicals, sunlight and inadvisable storage.

### Storage

Storage is a part of the maintenance and cleaning but is often ignored. Protective gloves should be stored in their original packaging which will keep them away from direct sunlight, chemicals and abrasive materials and protect them against physical damages of the hard surfaces or materials when it is not used or during shipment. Product should be stored in a dry and well-ventilated place. Availability of excessive humidity or intense light may adversely affect the product quality.

## Order Information

| MODEL  | Size    | Barcode        | Box Quantity | Box Dimension    | Box Weight |
